Idea 1 : health care app that allows user to keep track of prescriptions, Doctor appointments, medication, etc...

Idea 2 :

Possible 2nd Idea: an app for stage managers (for any kind of stage manager in the artistic world) that has multiple functionalities in order to assist the stage manager with daily job functions such as: keeping a cast/performer call sheet, cast/crew/performer contact sheet, crew call sheet, light cue sheet, sound cue sheet, any union contracts needed for cast/performer/crew, a cue list, a script/sheet with all the cues in order to which they need to be called, etc...

> Epics/User Stories for Idea 1:

Wagner-1: As a general user and patient, I want to use the health-app to be reminded of when to take my medications so that I can maintain my health, keep up with the specific days and times I must take my medication, and take my medication as part of my health program in order to maintain a healthy lifestyle.

Wagner-2: As a patient of multiple doctors, I want to keep track of all of my doctor appointments so that I never miss an appointment in order to receive the premium care that I need in an organized and timely manner that fits into my daily schedule.

Lee-1 : As a student user, I want to be able to easily record and view my nutrients intake in order to better understand effects of the food on my body.

Lee-2 : As an adult care-taker, I want to be able to visualize my patient's inputs records in order to better understand s/he's bodily trends.

Lee-3 : As a user who cares about my privacy, I want my medical/bodily records to be strongly protected so I would enjoy

Asmussen-1: As a user of the health app, I want a simple solution to help me take medicine on time and keep track of what specific medications I have to take, on the days I must take them. This will help me stay healthy.

Asmussen-2: As a user, I would like to be able to set recurring reminders for specified timelines because some medication I take, I might not always need (flu or common ailments). This will help me take my medicine more responsibly.

Chi-1: As a user of the health-app, I want to read a very clear prescription along with my medicines I have to take that would be able to help me understand about my circumstances and how does it go.

Chi-2: As a user of the health-app, I want to keep track on my medicines storage in order to have it filled up in advance during my treatment

>Epics/User Stories for Idea 2:

Keehan-1: As a stage manager, I want the app to be able to quickly be able to quickly contact any cast or crew and to be able to easily upload a pdf of my script to help follow along throughout the show.

Keehan-2: As a stage manager, I want the app to be able to organize a list of my cast by actor, musician, or stage crew and to be able to easily access their information such as their contract or address from this list.

Wagner-1: As a stage manager, I want the stage manager's app to allow me to compile a list of light and sound cues so that I, as a stage manager, am able to review and constantly reference them before and after inputting said cues into my final performance master cue and call list.

Wagner-2: As a cast/crew/performer, I want the stage manager's app to be able to give me access to any and all of my call times and sheets, any rehearsal schedules, and any notes/changes that are being made to the performance that I need to personally take note of and be aware of.

Idea 1: A health care app that allows user to keep track of prescriptions, Doctor appointments, medication, etc...

Idea 2: An app for stage managers (for any kind of stage manager in the artistic world) that has multiple functionalities in order to assist the stage manager with daily job functions such as: keeping a cast/performer call sheet, cast/crew/performer contact sheet, crew call sheet, light cue sheet, sound cue sheet, any union contracts needed for cast/performer/crew, a cue list, a script/sheet with all the cues in order to which they need to be called, etc... This particular idea falls into the “Music” category, which then permeates into the rest of the artistic industry.

> Epics/User Stories for Idea 1:

1. As a general user and patient, I want to use the health-app to be reminded when to take my medications so that I can maintain my health, keep up with the specific days and times I must take my medication, and take my medication as part of my health program to maintain a healthy lifestyle.
2. As a patient of multiple doctors, I want to keep track of all my doctor appointments so that I never miss an appointment and receive the premium care that I need in an organized and timely manner that fits into my daily schedule.
3. As a student user, I want to be able to easily record and view my nutrients intake to better understand effects of the food on my body.
4. As an adult care-taker, I want to be able to visualize my patient's inputs records to better understand s/he's bodily trends.
5. As a user who cares about my privacy, I want my medical/bodily records to be strongly protected so I would enjoy an app that contains all of my personal medical records while still maintain security.
6. As a user of the health-app, I want to read a very clear prescription along with my medicines I have to take so that I would be able to understand my circumstances and how I am doing medically.
7. As a user of the health-app, I want to keep track on my medicines storage in order to have it filled up in advance during my treatment whenever it gets low.

>Epics/User Stories for Stage Manager's App:

1. As a stage manager, I want the app to be able to quickly be able to quickly contact any cast or crew and to be able to easily upload a pdf of my script to help follow along throughout the show.
2. As a stage manager, I want the app to be able to organize a list of my cast by actor, musician, or stage crew and to be able to easily access their information such as their contract or address from this list.
3. As a stage manager, I want the stage manager's app to allow me to compile a list of light and sound cues so that I, as a stage manager, am able to review and constantly reference them before and after inputting said cues into my final performance master cue and call list.
4. As a cast/crew/performer, I want the stage manager's app to be able to give me access to any and all of my call times and sheets, any rehearsal schedules, and any notes/changes that are being made to the performance that I need to personally take note of and be aware of.
5. As a stage manager, I want a stage manager's app that allows me to work on multiple shows and keep track of multiple documents at the same time so that I am always working and have an easy method in to communicate and keep track of everyone and everything I need to keep track of.
