**Stage Manager's app:** An app for stage managers (for any kind of stage manager in the artistic world) that has multiple functionalities in order to assist the stage manager with daily job functions such as: keeping a cast/performer call sheet, cast/crew/performer contact sheet, crew call sheet, light cue sheet, sound cue sheet, any union contracts needed for cast/performer/crew, a master cue list, a script/sheet with all the cues in order to which they need to be called, etc... This particular idea falls into the "Music" category, which then permeates into the rest of the artistic industry.

#### **Epics/User Stories for Stage Manager's App:**

1. As a stage manager, I want the app to be able to quickly contact any cast or crew and to be able to easily upload a pdf of my script to help follow along throughout the show.
  - I would like to have a list of my casts/crews contact phone number/email address so that I can easily look up contact list if needed.

- a button that when clicked sorts the list by the category that is selected
  - I want a quick call button that allows me to quickly have a phone call by clicking on it.
    - a green button that looks like a phone that takes me to the phone app
  - I want to have an upload button which allows me to click on it to upload documents.
    - a blue button that has a white symbol of a document
    - select file
    - after file is selected click upload button
  - I want to have a cloud storage/place to store whatever documents I am uploading to.
    - a blue button at the top of the screen that syncs the uploaded documents to the cloud
  - I want to have an input button where I can add the name, phone number and email address into the Contact Information tab
    - a text field at the top of the list that, when clicked, brings the keyboard up to input info
  - I want a tab that allows me to send an email/message to either one or multiple people at the same time through the app
    - a blue button with a mail icon that composes a message to selected individuals
    - when clicked, goes to the email app
2. As a stage manager, I want the app to be able to organize a list of my cast by actor, musician, or stage crew and to be able to easily access their information such as their contract or address from this list.
- I want to be able to edit/update actor/musician/stage crew information if needed
    - similar to above, an input/form field to type in information and retrieve information
  - I want to be able to remove any actors from database if they are no longer with our team
    - red delete button that deletes selected individuals
  - I want to be able to keep track on and manage contract documents of any actors, musicians, stage crews that we are working with.

- a file icon next to the individual's name that brings up any relevant documentation for that individual
- I want a button that allows me to sort the list of names by name or position
  - search function by the category labels

3. As a stage manager, I want the stage manager's app to allow me to compile a list of light and sound cues so that I, as a stage manager, am able to review and constantly reference them before and after inputting said cues into my final performance master cue and call list.

- I want a Light Cue tab from the home menu
  - a button that has an icon of a light bulb
  - page consists of form fields for inputting cue name and description
- I want a Sound Cue tab from the home menu
  - a button that has an icon of a megaphone

- page consists of form fields for inputting cue name and description
- I want to easily input the light cue number, the light cue description and place where in the script the light cue needs to be called
  - form field for above information needed
- Ditto for sound cue list
  - form field for above information needed
- I want a master cue list tab that combines all of the light and sound cues into a master cue list with the light/sound cue number and it is ordered in where it needs to be called in the script
  - a combine button that creates a list of the cues in order in which they need to appear in the calling script

Home

Cue Name # When Cue is Called in Script Add

▼ Cue Name	▼ Cue #	▼ When Cue is Called	▼ Called
Cell 1	Cell 2	Cell 3	<input type="checkbox"/>
Cell 4	Cell 5	Cell 6	<input type="checkbox"/>
Cell 7	Cell 8	Cell 9	<input type="checkbox"/>
Cell 10	Cell 11	Cell 12	<input type="checkbox"/>

4. As a cast/crew/performer, I want the stage manager's app to be able to give me access to any and all of my call times and sheets, any rehearsal schedules, and any notes/changes that are being made to the performance that I need to personally take note of and be aware of.

- I want to be able to receive any announcements which are created by my manager.
  - an announcements button that lists all announcements
- As a stage manager, I want to be able to reserve a place/room/... for rehearsal/meeting
  - a button for reservations
  - form field for room name, time sheet
- As a stage manager, I want a button that allows me to, similar to creating announcements, type out/put up notes from the previous evening's rehearsal/performance for the performers/crew
  - a separate button for notes, picture of a pencil, for notes of a previous rehearsal

Home

Announcements	Call Times	Rehearsal Notes	Schedule
<div style="border: 1px solid black; height: 200px; position: relative;"> <div style="position: absolute; top: 0; left: 0; right: 0; bottom: 0;"> <div style="position: absolute; top: 0; left: 0; width: 100%; height: 100%; background: linear-gradient(to top right, transparent 49%, #ccc 49%, #ccc 51%, transparent 51%, transparent 53%);"></div> <div style="position: absolute; top: 0; right: 0; width: 100%; height: 100%; background: linear-gradient(to bottom right, transparent 49%, #ccc 49%, #ccc 51%, transparent 51%, transparent 53%);"></div> </div> </div>			

5. As a stage manager, I want a stage manager's app that allows me to work on multiple shows and keep track of multiple documents at the same time so that I am always working and have an easy method into communicate and keep track of everyone and everything I need to keep track of.

- I want to be able to have a tab that shows all the shows that I am working on.
  - a button per different show that I'm working on
- I want to be able to have a tab that shows all the documents that I am working on.
  - a document tab that has all the uploaded documents
- I want a button that organizes all shows/concerts/corporate events that I am working on by show
  - a form field that sorts each show by name
  - each show can be selected and then sent to corresponding documents/functionality

Show Name Add

Show 1 Link

Show 2 Link

Show 3 Link

Show 4 Link

6. As a stage manager, I want an app that allows me to store and hold documents that are related to various unions for actors/performers and crews.

- I want a button from the home menu for union paperwork
  - a button with the AEA/other generic union symbol on it
- I want to be able to upload signed documents to the app
  - upload button to upload documents
  - select file
  - after file is selected click upload button
- I want the app to be able to contact the various unions and send signed/uploaded paperwork to them
  - a contact union button that creates an email to that specific union

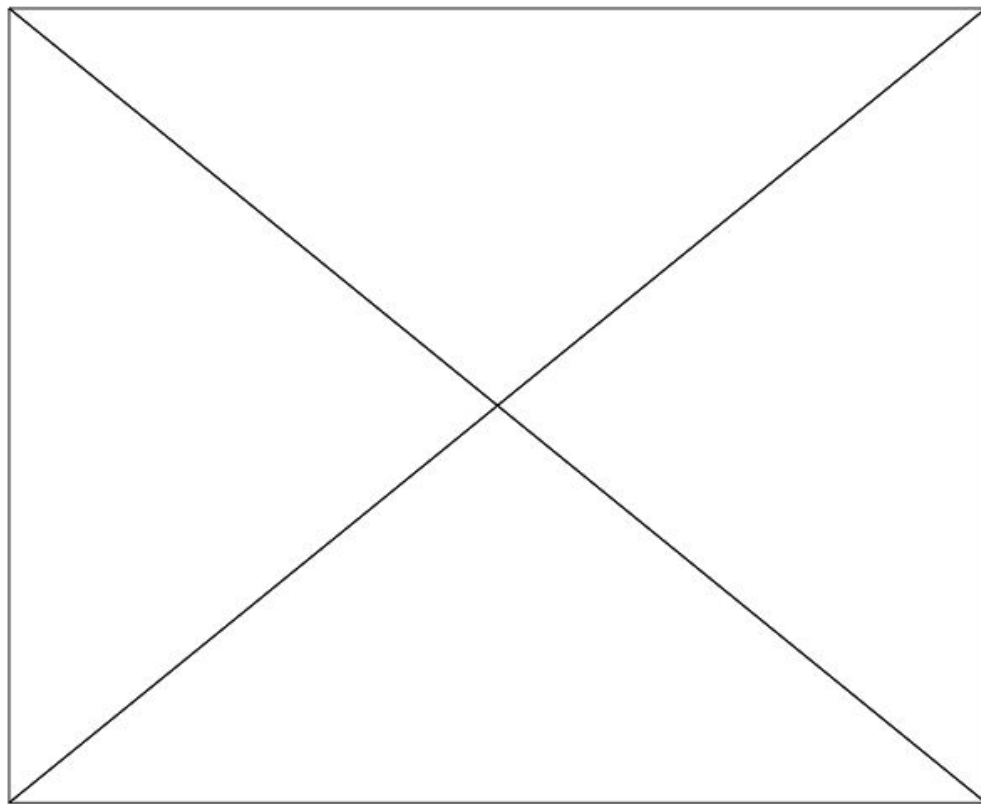

Home

Add Document

Choose Union

Add

Union 1	Union 2	Union 3	Union 4
---------	---------	---------	---------

7. As a stage manager, I want an app that allows me to upload and incorporate various functions into my “calling”/main script.

- I want a button that takes me to my master script
  - a button for the master script with a script icon on it
- I want a button to upload the master script with all cues and calls that I have written in
  - upload button to upload script document
  - select file
  - after file is selected click upload button
- I want a menu selection that lets me choose between a sound, light, or an “other” cue in which then I can move around on my script and type out the cue description and cue number

- menu bar for each type of cue in script

8. (An extension of number 7) As a stage manager, I want an app that allows me to upload and keep track of multiple copies of the same script so that I can use one for blocking notes and the other as a master call/cue script.

- I want a button that takes me to an uploaded script
  - a button for the master script
  - select file
  - after file is selected click upload button
- I want a button to upload a script
  - an upload button
  - select file
  - after file is selected click upload button
- I want a button that allows me to choose where to categorize the script
  - i.e. whether that is a “blocking/notes” script versus a “calling script”

Add Master Script

Add

Blocking

Master

9. As a stage manager, I want an app that allows me to input blocking notes that correspond to my “blocking script/notes.”

- I want a button that takes me to my already uploaded blocking script
  - a blocking script button
- in the blocking script section of the app, I want there to be an option to create blocking notes for a particular page/scene of my script
  - a button for blocking notes
- in the blocking notes portion of this section of the app, I want a selection menu that allows me to create a rough diagram of my stage
  - menu bar with different symbols for the stage, props, set
  - at menu bar symbol for stage
  - at menu bar symbol for different types of props
  - symbol for sets
- I want a button for set and props and to then be able to manipulate them in a way that shows where exactly they are at the top of the scene and where they end up at the end

- moving capability of selected symbols
